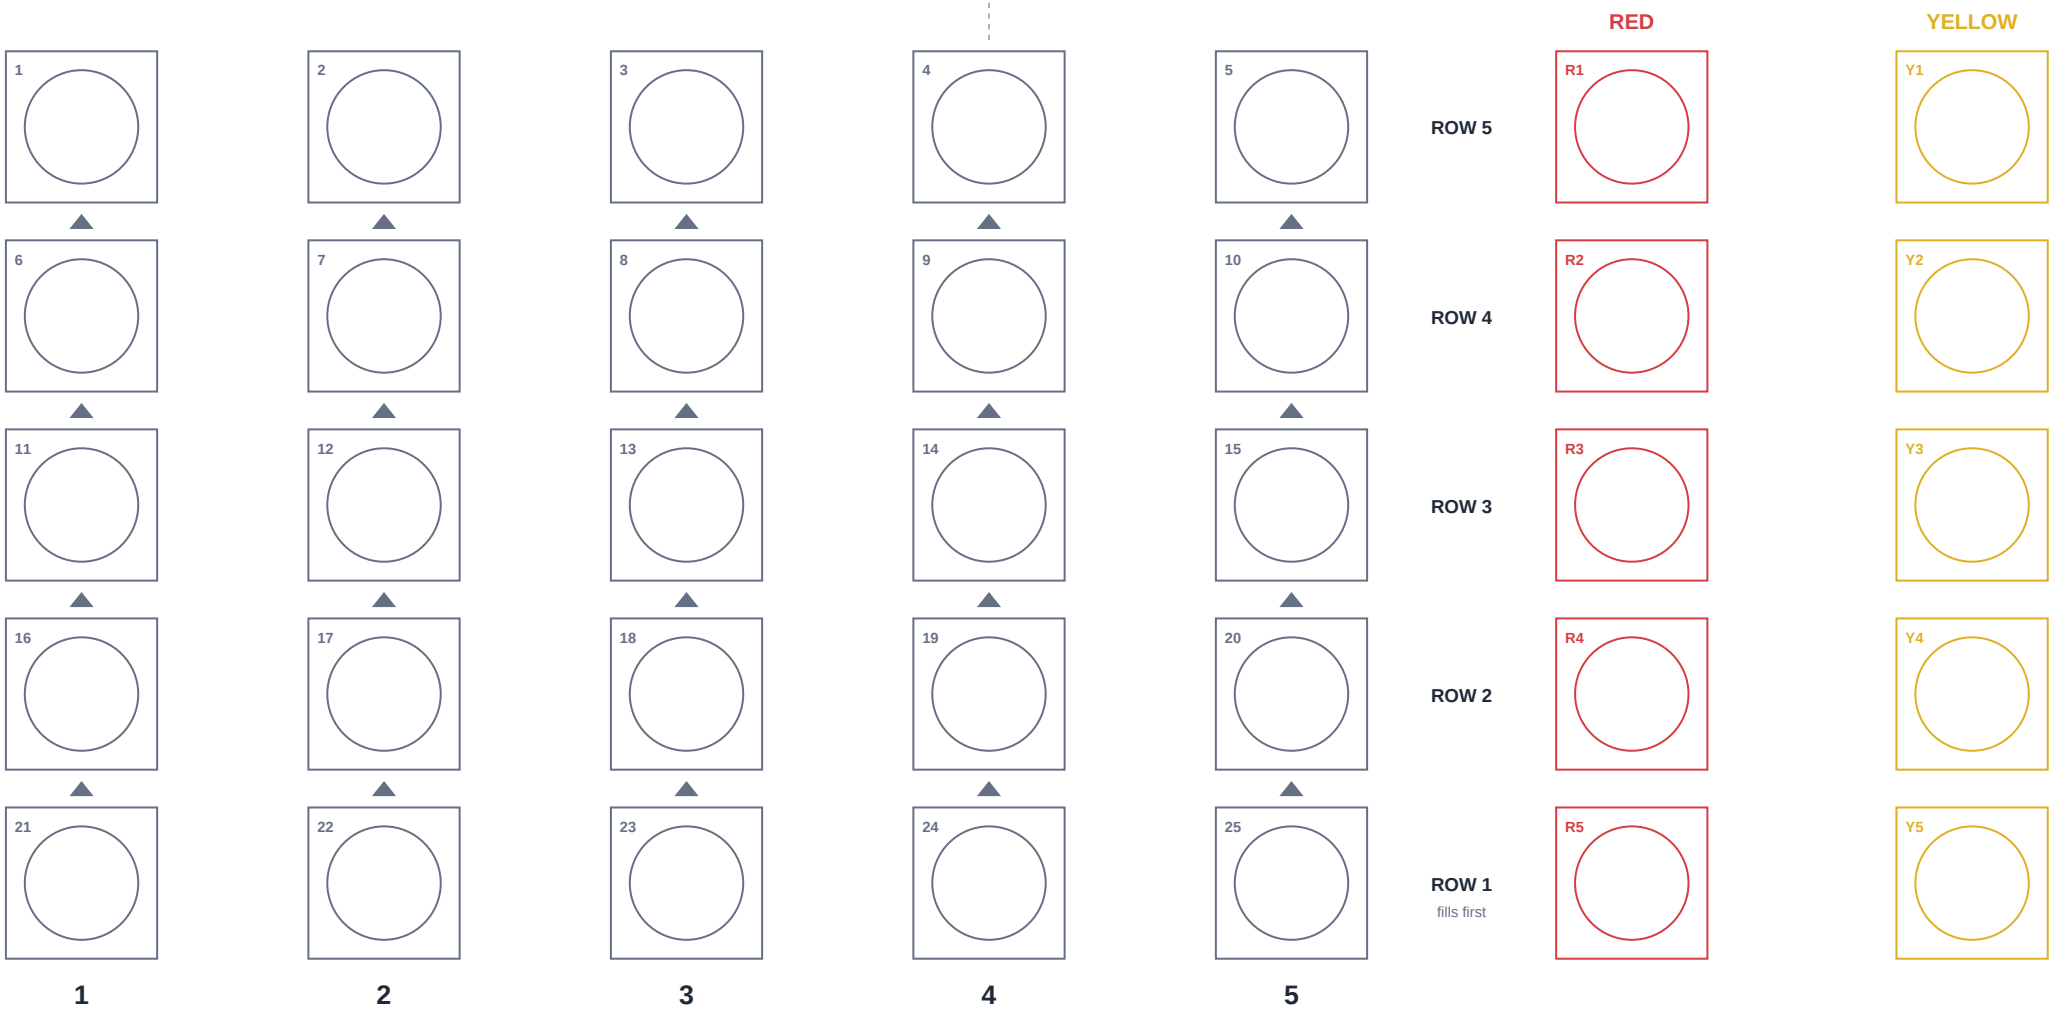
ROBOT

Turntable centre 60 mm from this edge, in line with the mark

AVOID THREE | 5 x 5



Choose a column: the block goes in its lowest empty square. Each column fills from ROW 1 (nearest you) upwards, so a square can only be used once the one below it is filled. 3 of your colour in a line (across, up or diagonal) loses.

20 x 20 mm squares | 15 mm circles | rows 25 mm, columns 40 mm apart (+5 mm before Red and Yellow) | Print at 100% (not 'fit to page')

this bar should measure 50 mm

AVOID THREE | BLOCK LABELS

15 x 15 mm squares | 30 red + 30 yellow

Print at 100%. Cut out and stick one on top of each block (15 per colour, plus spares).
